

RAJU KUMAR

Analytics Solutions & AI Engineer — Enterprise Tableau Dashboards | SQL Data Preparation | Data Modelling & Analytics
Hyderabad, India | +91-9661760718 | rajukumardalimss@gmail.com
linkedin.com/in/raju-kumar7388 | github.com/RajuKumar077 | therajukumar.vercel.app

PROFESSIONAL SUMMARY

Solution-oriented and technically curious Analytics Professional with 1.5+ years of experience transforming business requirements into high-quality technical analytics solutions. Proven track record designing, testing, and maintaining corporate Tableau dashboards to provide data-driven insights that center on user needs within agile environments. Competent in enterprise data presentation, data modelling, and using SQL for complex data preparation and data normalization.

SKILLS

Visualization & Business Intelligence: Tableau Products (Tableau Desktop, Tableau Server), Dashboard Design, Looker Products, Enterprise Data Presentation, Visualisation Design Skills, Metric Monitoring

Data Engineering & Data Modelling: SQL for Data Preparation, Data Modelling Methods, Data Collection & Normalization, ETL Pipelines, Google Cloud BigQuery, MySQL, Database Performance Tuning

Core Methods & Frameworks: Agile Development Practices, Git Version Control, Python (Pandas, NumPy), Solution Planning, Analytical & Critical Thinking, Technical Collaboration

AI & Generative AI: Large Language Models (LLMs), Generative AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, LangChain, FAISS Vector Store, Predictive Modeling, Vertex AI

Cloud, MLOps & Automation: Amazon Web Services (AWS), AWS SageMaker, AWS EC2, Google Cloud Platform (GCP), Microsoft Azure, MLOps Model Deployment, UiPath Robotic Process Automation (RPA)

Web & Languages: Java, JavaScript, React.js, Node.js, REST APIs

PROFESSIONAL EXPERIENCE

Wipro Limited (Apple Account) Dec 2024 - Present
AI/ML Engineer (Promoted from Associate Trainee within 4 months) Hyderabad, India

- Partnered with cross-functional tech teams and business professionals to understand business requirements, transforming complex stakeholder expectations into metrics aligned with domain priorities.
- Developed, designed, and maintained high-performance Tableau dashboards for 50+ stakeholders, utilizing built-in visualization design methods and an integrated Python layer to deliver data-driven insights.
- Architected real-time Python/SQL data preparation and ETL normalization pipelines into GCP BigQuery, successfully collecting and processing 500,000+ daily records to fulfill business data needs.
- Managed Tableau server-ready configurations, actively tracking dashboard workbook usability and resolving data or performance issues to cut down weekly manual reporting workloads by 40 hours.
- Collaborated within a dynamic, agile environment to build a Python process automation framework, shrinking batch data analysis cycle times from 8 hours down to 15 minutes.
- Engineered an LLM-orchestrated incident triage workflow that utilizes predictive modeling to score escalation risk, establishing solution-oriented tools to address underlying operational data requirements.

Psyliq Dec 2023 - Mar 2024
Data Analyst Intern Hyderabad, India

- Refactored complex SQL query logic across extensive workforce datasets to streamline data preparation, boosting data retrieval efficiency by 30% and reducing server script latency by 15%.
- Executed advanced data modelling and trend analysis for 10+ leaders through automated reporting pipelines, increasing actionable insight presentation by 35% and removing manual reporting bottlenecks.

HighRadius Technologies Jan 2022 - Nov 2022
RPA & Full-Stack Development Intern (Two Rotations) Bhubaneswar, India

- Built robust Java, JavaScript, and SQL automated workflows within financial services enterprise environments to optimize data collection, normalization, and operational reporting.
- Delivered a full-stack machine learning integrated web application (React.js, Node.js, Python, MySQL), managing the entire process lifecycle from database data modelling through to interactive visualization interface design and production deployment.

PROJECTS

- Real-Time Operational Data Pipeline & Analytics Dashboard

Python, SQL, GCP BigQuery

 - Developed a data ingestion pipeline processing 500,000+ daily data records, incorporating robust cleanup, normalization, and performance metrics to feed live analytical reports tracking system health.
- Full-Stack Data Modelling & Analytics Web App

React.js, Node.js, Python, MySQL

 - Designed a production web app featuring detailed visualization layout adjustments, implementing clean relational data modelling and optimizing underlying SQL query methods to manage enterprise data presentation.
- Intelligent Analytical Automation Framework

RPA, Python, MLOps

 - Automated corporate data processing tasks, using targeted Python scripts to compress reporting preparation cycles from 8 hours to 15 minutes while raising metric tracking precision to 99.7%.
- Institutional Knowledge Extraction Assistant (RAG System)

LangChain, OpenAI, FAISS

 - Assembled a text retrieval framework over a custom vector store to process unstructured documentation, resolving intricate data needs and reducing knowledge navigation delays by 40%.

EDUCATION

- Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

Apr 2019 - Jun 2023

Bachelor of Technology, Computer Science and Engineering
- upGrad KnowledgeHut (Professional Training Program)

Dec 2023 - Jul 2024

Data Scientist Bootcamp: Machine Learning, Statistical Modeling, and Data Engineering

CERTIFICATIONS

- Investment Analysis and Portfolio Management — Fervent, May 2026
- Google Cloud Digital Leader — Google, Jul 2025 (Valid through Jul 2028)
- Developing AI Solutions in Azure (AI-102) — Koenig Solutions, Apr 2026
- Introduction to Amazon SageMaker — AWS, May 2025
- Oracle Cloud Infrastructure: Generative AI Professional — Oracle, Jul 2025
- Master Vertex AI: LLMs with Text-Embeddings API — Udemy, Jul 2025
- Building a Generative AI-Ready Organization — AWS, May 2025
- Oracle Cloud AI Foundations Associate — Oracle, Jun 2025
- Microsoft Azure Security Technologies — Microsoft, Mar 2025
- AI Engineer Certification — OneRoadmap, Mar 2026

KEY ACHIEVEMENTS

- Promoted in 4 months at Wipro from Associate Trainee to AI/ML Engineer on a major account, handling analytics implementations and data transformations.
- Certified across 4 major cloud environments within a 12-month window, establishing core competency across enterprise system platforms and visualization architectures.
- Completed British Airways Data Science Simulation (Forage, Jan 2024); applied data modelling and visualization methods to extract buying-behavior insights from customer reviews.
- Earned HackerRank Software Engineer Credential (Sep 2024), demonstrating verified industry competency in database data modelling, structure administration, and SQL optimization.

ADDITIONAL INFORMATION

Availability: Open to Remote, Hybrid, and Relocation. **Focus Areas:** Business Intelligence Solutions, Analytics Presentation, Agile Project Collaboration, Financial Services Data. **Portfolio:** [therajukumar.vercel.app](#) | **GitHub:** [github.com/RajuKumar077](#)
